TOUCH FRAME KEETOUCH 60"
KP-600-IPOS001

FLEXIBLE SIZE
Impact-resistant Infrared steel touch frames are an ideal solution for large touch surfaces of unlimited sizes. The size range is their key advantage. It's possible to produce small size screens starting from 10inch as well as the frames of nearly unlimited sizes up to 98". Infrared touch frames are used wherever high-definition and colorful image is required. They are perfect for presentations, commercials and digital signage as well as educational institutions.
MultiTOUCH
Supports 2 to 40 touch points (optional). Double-touch interface supports scaling, zooming and image rotating. Learn more on installing the touch technology software drivers for IR devices.
INFRARED TOUCH TECHNOLOGY
No pressure required: responses to a quick light touch of any object.
