TOUCH SCREEN KEETOUCH 19"
KP-190-SWOSOU2

Single-TOUCH
Surface Acoustic Wave single-touch screens with protective frame are perfect for step-by-step use. Convenient single-touch technology prevents accidental touches:
While running production lines
While interacting with the Human Machine Interface (HMI)
While entering a password at security checkpoints
While entering data through payment terminals and ATMs
Single-touch support allows working with non-adapted Windows software: no reinstallation of the software is needed for touchscreen equipment.
Optional double-touch makes gesture control possible: scroll, swipe, zoom and scale. Learn more on installing the touch technology software drivers for SAW devices.
ANTIVANDAL TECHNOLOGIES
Shock-resistant tempered glass with a 4-6 mm thickness and a 7H hardness is almost impossible to break accidentally.
